Subject: RE: Dimock Investigation - first thing tomorrow... I'm taking the  train today

Left a message with the reporter that we'd try to get back to him tomorrow. And if that was a problem, suggested he call me at my desk phone. My blackberry is currently out of commission. Jerome McGriff has had it since last Thursday.

Subject: Dimock Investigation

Hello Terri:

Looking to clear up a few facts regarding the water well-contamination investigation in Dimock, Pa., I hope you can answer these three questions:

- Did the investigation end because EPA officials determined fracking, specifically, did not cause contamination?
- Do EPA officials agree the water is no longer contaminated or never was contaminated?
- What does EPA intend to do about property owners who say their water is still contaminated?

I hope you can offer some guidance here. Thank you.
